

# this is a heading

- bullet point

*italic*

**bold**

# slide 2

- many
- bullet
- points
- about
- five (one line) bullet points can fit in one

slide, but of course longer lines in the  
markdown file can change this.

# how much can you write in one line?

there is of course a limit on how much space one line can take up in one slide, but another slide is automatically made if the text goes out of bounds.

you have roughly 28 characters of space in the title until the title goes to the second line and 39 for normal lines
